

Academic Integrity Facilitator List Fall 2007 - Spring 2008

Revised 2/4/08

The role of the Academic Integrity Facilitator is to provide information about Oklahoma State University's academic integrity policy and procedures, and serve as an impartial observer during the initial meeting between the instructor and student. The facilitator does not act as a mediator or negotiator, but aids the academic integrity process by explaining the standard of proof required for an allegation and encouraging the instructor and student to reach their own conclusion after they discuss the evidence supporting the alleged violation of academic integrity. The facilitator will describe the appeals process if the student and instructor disagree about the student's responsibility for the violation or the appropriateness of the sanction and provide a copy of the appeal form.

Instructors are not required to select Facilitators from the same department or college.
